

Interface Kit

The components Storystick is built from — tokens, controls, both canvas modes, and the two shells they live in. Everything here uses only the brand palette and the three brand typefaces.

01 — TOKENS

Design tokens

Ship these as CSS custom properties. Component code should never contain a raw hex value.

COLOR

--blueprint

#0F2338

Canvas chrome, headers, reverse fields

--canvas

#0B1A2B

The drawing surface in Blueprint mode

--panel

#132B44

Side panels and the toolbar body

--blue	 #1B5FA6 Primary actions, links, active tools
--sky	 #3E86CE Hover on blue, dimension lines on dark
--chalk	 #A9C7E5 Geometry and grid on dark, secondary text on dark
--cedar	 #D98235 Selection, active tool, the one primary CTA
--ember	 #EFA860 Cedar for dark surfaces
--cedar-deep	 #9E5813 Cedar that carries text on light
--vellum	 #F7F4ED Default light background, Paper-mode canvas
--paper	 #FFFFFF Cards, inputs, elevated surfaces
--graphite	 #46525E Body copy on light
--slate	 #65717C Secondary text, labels, captions
--slate-40	 #8A97A3 Disabled, placeholder, decorative
--mist	 #E4E9EE Borders, dividers, rules
--green / --green-deep	  #1F9D6B / #177C54 Snapped, square, in tolerance
--red / --red-deep	  #D14343 / #B93636 Out of tolerance, conflict, destructive

SPACE, RADIUS, ELEVATION

--sp	8 px base. All spacing is a multiple: 4, 8, 12, 16, 24, 32, 48, 64.
--r-sm	6 px — chips, small buttons, inline controls
--r	9 px — buttons, inputs, alerts
--r-lg	14 px — cards, panels, the app shell
--r-xl	20 px — modals, hero surfaces
--sh-1	0 1px 2px rgba(15,35,56,.07) — resting cards
--sh-2	0 3px 10px rgba(15,35,56,.10) — dropdowns, hover lift
--sh-3	0 12px 34px rgba(15,35,56,.16) — modals, the app frame

Shadows are always tinted with Blueprint, never neutral black. It is a small thing that keeps the whole interface in one color family.

02 — ACTIONS

Buttons

Start a drawing

Import a plan

Cancel

Add dimension

Delete wall

Unavailable

Focused

HEIGHT 40 • RADIUS 9 • INTER SEMIBOLD 14 • ICON GAP 8

Small

Default

Large

32 / 40 / 50 PX

One cedar per screen

Drafting Blue is the workhorse primary. Cedar is reserved for the single most important action in view — usually the one that commits a measurement. Two cedar buttons on one screen means neither is primary.

Destructive is deep red

Plumb Red Deep #B93636, never the bright Plumb Red, because buttons carry text and must clear 4.5:1.

03 — INPUT

Fields & dimensions

PROJECT NAME

Prose fields are set in Inter.

WALL LENGTH

Dimensions are always IBM Plex Mono.

UNITS

☒ FT-IN☐ IN☐ MM

STUD SPACING

! Not a standard spacing. Snap to 16" on-center?

CEILING HEIGHT

Applies to every wall in this room.

Errors never simply report. Each one names the likely fix and offers it as something the user can act on — that is the difference between an instrument and a form.

04 — STATUS

Chips, tabs & messages

● Draft

● Square

● Selected

● Out of tolerance

Archived

Plan

Elevation

Section

Materials

Cut list

Snapped to 16" on-center

Stud spacing is consistent across all four bays.

This span needs a header

At 6'-0" wide, a 2×10 header is typical. Check your local code.

Cut list updated

Three parts changed when you moved the middle shelf.

Wall doesn't close

There's a 1/4" gap at the northeast corner. **Close it**

05 — TOOLS

Drawing toolbar

38 PX TARGETS • 7 PX RADIUS • CEDAR MARKS THE ACTIVE TOOL • ICONS 1.7 PX STROKE, ROUND CAPS

Only one thing on the canvas is cedar at a time: the active tool, or the selected geometry.
That single rule is what stops the interface from turning orange.

06 — SHELL

Blueprint mode

The default. Dark canvas, chalk geometry, cedar on the selected element.

Guest bath / 2nd floor / plan

08 — RULES

Non-negotiables

Mono means exact

Any value the user could mis-read by a sixteenth is IBM Plex Mono. Prose is Inter. There is no third case.

Cedar is singular

One cedar element per view: the active tool, the selected object, or the primary action. Never all three.

Color is never alone

Every state that uses color also changes a shape, an icon, or a label. Sun glare and color vision deficiency both defeat color-only signals.

Touch targets are 40

Nothing interactive is under 40 px on touch. This app gets used with a pencil behind the ear and sawdust on the screen.

Both modes ship

Paper mode is not a dark-mode afterthought inverted. It is drawn, checked, and printed on its own terms.

No raw hex

Components reference tokens. When the palette shifts, one file changes.
